PROBUS

Network

An Introductory Newsletter

IPN PROBUS is for PROBUS members who can get together and reap the benefits of having fun, fellowship and enjoyment on the Internet.

How do they achieve this with IPN

IPN members from around the world have been successfully communicating for over 22 years and have developed a close and friendly relationship with fellow members where they can discuss topics of interest either about local or PROBUS club matters in their town, district, region, or hemisphere while refraining from politics or religion. Even weather conditions may crop up, especially when we think of climatic changes that are occurring at the present time.

The 22 years has taken the shape in many forms with inter group emailing among members, chat groups, photographic groups, ladies groups and a topicalprobe group and we take very seriously the privacy of our members at this present time.

To join you must be a member of a probus club in your country.

To comply with Data Protection laws especially those which have just come into force in the EU in May 2018 we ask you to give your consent for your details :- Full name, email address, PROBUS Club meeting date, time & place, Club Gender(Men. Ladies, Combined), Location of club, Additional Details.

The information you provide on the Application form will be used by the International PROBUS Network club for purposes only in connection with the running of the club, which includes communicating by email.

It will never be disclosed for marketing purposes or passed to other non PROBUS bodies.

If you decide to leave the group at any time due to health reasons or bereavement then all your details will be removed.

So what is happening in the IPN world Today.

We have two groups of members IPNCAN and IPNUK each with a coordinator to manage the group. Both groups contain members from different countries even though they say CAN & UK that is only where the coordinator resides. A Senior membership coordinator is responsible for all the overall membership duties and allocates new members to the two groups.

Looking into the Future

We have a small group of seven IPN members with a vast experience of PROBUS in Australia, Canada & the UK who are working on the future of IPN PROBUS Networking to enhance the opportunities that the future years gives us.

A brochure has been promoted to outlay our aims & goals which you may like to read as well in a separate pdf file called IPN brochure.
